SUMMARY

Frontend Developer with 5+ years of commercial experience building web applications with React. I own the frontend end to end: choosing the stack, designing the architecture, integrating APIs and taking products to production. Built products from scratch as the sole frontend developer, including a large CRM for influencer agencies and an online crypto exchange. Also experienced with Vue and Angular; I use AI coding agents daily to ship faster without cutting corners.

EXPERIENCE

Frontend Developer — Kliox

Feb 2026 – Present · Remote

Multiple web applications & core architecture

- Build new web applications from scratch and maintain and scale existing projects with React, Vue and JavaScript
- Own the full development cycle, from architecture design to feature implementation, bug fixing and SEO optimization
- Use AI coding tools (Claude, Codex, Gemini) to speed up development and refactor complex logic

Frontend Developer — UpUp

Jun 2025 – Feb 2026 · Remote

Enterprise web ecosystem & AI solutions

- Maintained and developed 10+ interconnected Angular projects, keeping the whole ecosystem consistent
- Delivered features and bug fixes for major GitHub-managed releases; also worked on React and AI-powered projects
- Communicated directly with clients to clarify requirements, report progress and agree on priorities
- Contributed to cross-project architecture improvements and shared component libraries

Frontend Developer — Influencer Hero

Mar 2023 – Apr 2025 · Remote

Creator management CRM for influencer agencies · app.influencer-hero.com

- Built the frontend from scratch as the sole frontend developer: chose the stack (React, Redux, Redux-Saga, React Hook Form, MUI) and designed the project architecture
- Developed multi-step campaign creation flows, media upload, dashboards and admin tools
- Integrated complex APIs (chat, campaign logic, analytics) and managed global state with Redux and Redux-Saga
- Set up storage, led the frontend independently and prepared the product for production release
- Worked closely with product and design on UX, fixed high-priority bugs and took part in code reviews

Frontend Developer — SoloWay Technologies (formerly bvblogic)

Nov 2021 – Mar 2023

BuyBank, online cryptocurrency exchange · buybank.io

- Built the exchange web application from scratch in React and supported it after launch
- Implemented the exchange calculator with complex calculation logic
- Developed secure KYC flows, transaction history and user dashboards
- Refactored the React/Redux codebase, improved performance and reduced technical debt
- Worked with QA and backend teams to make sure features were complete and stable

SKILLS

Core	JavaScript (ES6+), TypeScript, React, Next.js, Redux, Redux-Saga, React Hook Form
UI	MUI, Ant Design, Styled Components, SCSS, Bootstrap, responsive layout
Also	Vue 3, Nuxt.js, Pinia, Vuex, Angular 12+, RxJS, NgRx, Angular Material
APIs & tools	REST APIs, WebSockets (Socket.io), Git (GitHub, GitLab, Bitbucket), CI/CD (GitHub Actions), Jest, React Testing Library, Figma, Jira
AI	AI-assisted development (Claude Code, Codex, Gemini), AI integrations in web products

EDUCATION

Master's, Software Engineering · 2021 – 2023

Bachelor's, Computer Science · 2017 – 2021

Ivano-Frankivsk National Technical University of Oil & Gas

LANGUAGES

Ukrainian — Native

English — Upper-Intermediate (B2)
